500 YEARS OF MANUFACTURING TRADITION

TECHNOLOGY INNOVATION DESIGN

Welcome to Beretta, where 500 years of tradition go hand in hand with the most advanced technologies, to create what we call “Technological Craftmanship”.

Tradition is invaluable, especially if handed down for 15 generations for nearly 500 years. And even if it would be enough to make us unique in the world, there is another aspect that reinforces the leadership of Beretta: the ability to combine every day this centenary experience with state-of-the-art technology, innovation and

progress. It is not a trivial matter: it is what distinguishes the Beretta product from any other and it is, at the same time, the reason why of its high quality and performance. And today that new technologies are becoming an essential part even in outdoor activities, Beretta is at the forefront to bring the benefits of this technological

revolution to hunters and shooters around the World, always respecting tradition. That's why owning a Beretta product means belonging to a unique club, open to people looking with determination to the future with a view that only 500 years of history allows.

GunPod 2
The mobile app is
designed for iOS
and Android

gunpod.beretta.com

New GunPod 2. Your first digital hunting diary, intuitive and easy to use. Stop wondering how many rounds you shot last month or how many miles you walked with your dog: GunPod 2 will hold these statistics for you! The highlights of your hunting sessions, along with photos and videos, finally collected in a handy digital archive. And if you want to share on social networks? With GunPod 2 you can.

GunPod 2

The GunPod 2 system is primarily composed by a Bluetooth shotcounting device integrated into the stock and by an app for smartphone (no GPS device is installed on the shotgun).

To learn more about the requirements of the smartphone (smartphone not included) please visit gunpod.beretta.com

Using the GunPod 2 is very easy: you just have to launch the app, start a session, put your smartphone in a pocket and GunPod 2 will do the rest. The mobile app will receive shot acknowledges from the shotgun* and will collect all the relevant data in background for you, without distracting you from your hunting experience. And if you want to take photos or videos and add them to your session stream? Easier done than said. And when you come back home, a web dashboard will allow you to see again, on a bigger screen, the best moments of your day. You will not envy runners and bikers anymore: finally hunting has a digital diary too.

* GunPod 2 on-board device required
The Bluetooth word mark and logos are owned by Bluetooth SIG

CENTENNIAL
1915-2015

1915 PCS

Limited edition

415pcs Cal. 9x21 + 1.500 pcs Cal. 9x19

92FS/98FS Centennial.

This outstanding Limited Edition celebrates the 100th anniversary of the first Beretta semiautomatic pistol, the famous Mod. 1915. Steel frame, adjustable sights, polished barrel, laser micro-pattern engraving on the slide, wood-grips with dedicated medal, safety on the frame, premium-grade finishing and a special metal packaging enrich this model to create a truly unique masterpiece.

Mod. 1915 pistol

486

by
Marc Newson.

"To be asked to design for Beretta, one of the oldest companies in the world with its roots in the Italian Renaissance, was a great honour. One of the things I like most about my job as a designer is the opportunity I get to immerse myself in different industries and acquire knowledge about their manufacturing processes, materials and technologies. I am interested in the way things work – it's a technical obsession. The main focus for my design of the 486 was to simplify and rationalise all the surfaces. Specifically streamlining the area of the action. During the manufacture of my design in the Beretta workshops I got to observe the fascinating mix of traditional skills employed by Beretta's craftsmen in conjunction with the most impressive state-of-the-art engineering processes including the use of intricate x-ray equipment, sophisticated laser technology and robotics. With these standards of ingenuity I believe that my vision to create an innovative and modern design while respecting the DNA of the product typology has been spectacularly achieved."

Marc Newson

NEW
Novità
NOU
VEAU
HOBOCTH

Edgeless receiver

The traditional design of side by side shotguns has always been very simple and elegant. Over the years, the "round body" design has been introduced to emphasize the slimmness and lightness of the gun. Marc Newson has used the characteristics of steel and modern machining to elevate the concept of the "round body", bringing it to a new level. The receiver is edgeless and the lines flow through the entire surface of the shotgun with no sharp edges or breaks.

New lever design

This element has been specially conceived to emphasize its independence from the rest of the shotgun.

Wood-bridge

The traditional tail of the receiver has been lowered allowing the wood to separate the receiver and the safety/selector like a wooden bridge over the steel. This unique design makes the 486 by Marc Newson extremely elegant and instantly recognizable.

A400 Xcel MULTITARGET

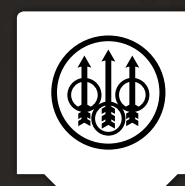

A400 Xcel Multitarget. B-Fast adjustable rib and stock, oversized controls, Balance-Cap adjustment device and a lot more for the most technological competition semiauto ever made by Beretta. Available also in Kick-Off version.

- 1 **Optimabore HP barrel**
Interchangeable-chokes barrels, designed for the best performance with both lead and HP steel shots.
- 2 **B-Fast adjustable rib**
Aluminum alloy adjustable rib (4mm, micrometric), designed to provide a 50/50-100/0 point-of-impact range. Thanks to the removable ramp (made of aluminum alloy too) mounted on the receiver, the target acquisition is easier, faster and even more accurate.
- 3 **Montecarlo B-Fast stock**
Adjustable drop 41/41/64 with B-Fast, available also in Kick-Off version for an outstanding recoil absorption and muzzle raise reduction.
- 4 **B-Link gas-operated system**
Faster and cleaner than any other functioning system ever made by Beretta (36% faster cycling speed).
- 5 **B-Fast Balance**
Conceived to provide an easy and accurate balance adjustment system to your competition shotgun, the B-Fast Balance allows to modify the weight of the cap to compensate the natural density variability of wood. The shotgun comes with the medium-weight cap mounted and the stock is ready for additional weight-wads for an even more precise adjustment.
- 6 **2,5+ wood grade BTS**
Stock and forend are made of selected walnut wood with BTS finishing, ensuring the best look and reparability.
- 7 **Nickel-coated receiver**
The first "white-receiver" A400, featuring a special nickel coating providing outstanding resistance to corrosion.
- 8 **Microcore pad**
Superior softness, lightness and smoothness for the best recoil pad ever made by Beretta.

690

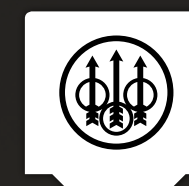

Trap

- 1 Microcore pad**
Superior softness, lightness and smoothness for the best recoil pad ever made by Beretta.
 - 2 Orange stock spacer**
A distinctive element matching with the product's logo, making the 690 unique and recognizable.
 - 3 Selected wood**
The perfect weight for these walnut wood, specifically selected for competition over and unders.
 - 4 Overmoulded and soft-touch opening lever**
Engineered for the first time by Beretta on an O/U shotgun, this solution provides the best grip even in the hardest conditions.
 - 5 Black receiver**
Hyper-technical look and matt/polished finishings for this attractive receiver, immediately recognizable by the orange details.
 - 6 Slim forend**
Slim and rounded forend, for a better grip and a more streamlined profile.
 - 7 Steelium barrel**
The world's best barrel, providing unrivaled safety and superior ballistics.
 - 8 Optimachoke HP**
Interchangeable-chokes barrels, designed for the best performance with both lead and HP steel shots.
 - 9 Matt barrel**
Anti-glare finish to provide the best target acquisition conditions for the shooter.

New 690 Sporting and Trap: the competition over and unders to make your quantum leap in shooting performance. Thanks to the Steelium barrel and to the outstanding balance, the new 690 competition shotguns provide accuracy, ease of handling and perfect control. Exactly what you need when you start aiming to your first 25.

**THE BERETTA COMTEK MID BOOT
AWARDED WITH THE "BEST OF 2014" PRIZE
BY REVUE NATIONALE DE LA CHASSE!**

Les Beretta Comtek Mid
Du super lourd, léger à souhait!

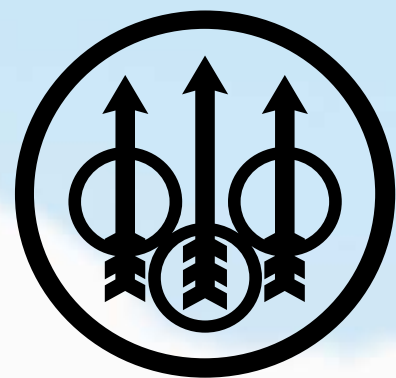

Bien qu'ils soient les plus légers du marché, ces nouvelles chaussures Comtek Mid de chez Beretta « sont du lourd! ». Les matériaux utilisés sont solides, robustes, hydrofuges et résistants aux éraflures, ce qui en fera un produit idéal pour les traqueurs et bécasseurs. La légèreté et la souplesse des Comtek Mid appartiennent également à un confort inégalé aux chasseurs de montagne. Leur revêtement est parfaitement hydrofuge, avec 2,4 mm de cuir plus une troisième semelle d'isolation thermique en Gore-Tex. Au contact du sol, un caoutchouc Vibram en micro EVA. Au contact de la cheville, une tige dies Comtek (21 cm) procure un parfait maintien de la cheville. Sans doute les chaussures de chasse incontournables que nous ayons testées. Le modèle environ 299 €.

La RNC
les aime pour:
• Leur légèreté
• Leur confort
• Leur solidité
• Leur maintien de la cheville

Field Semiautomatic Shotguns

A400

A400 is the most technologic semiautomatic platform ever built by Beretta, featuring some of the most innovative technological solutions in the shotgun market. The ballistic excellence of the Steelium barrel, together with the unrivaled shock absorption of the Kick-Off systems, the reliability of the B-Link gas operating system and the benefits of the GunPod digital tools make the A400 a point of reference in the world of shotguns.

A300

Born to satisfy the needs of hunters who never compromise on quality, the A300 range offers maximum reliability and durability to a very interesting price. The A300 shotguns are available in wood and synthetic versions.

reasons to buy a
Beretta semiauto.

semiautomatic.beretta.com

The A400 technological features

WORLD'S BEST BARRELS

1 STEELIUM

Steelium is the production technology of the Beretta barrels, making the special tri-alloy steel become an outstanding ballistic jewel, thanks to a manufacturing process that is just as unique. Gundrilling, cold hammer forging special vacuum relieving give steel the ideal mechanical characteristic for superior ballistic performance.

PERFECT BALLISTICS

2 OPTIMABORE HP

With a production begun in 1526, now accounting for more than 500,000 barrels a year, Beretta is a world leader in technological research applied to ballistics. The Optimabore HP technology, combined with Steelium, provides excellent accuracy and pattern quality with both lead and Steel HP shots.

36% FASTER AND CLEANER

3 BLINK

Blink is the engine of every A400 shotgun, providing exceptional reloading speed combined with power and cleanliness at the top of the category. Being the fastest to fire the next shot means increasing the chance of hitting the target.

SOFTER & LIGHTER THAN RUBBER

4 MicroCore

Microcore is an innovative recoil pad developed by Beretta thanks to its experience in decades of competitions around the world. Thanks to the open cell technopolymer - softer, lighter and more slippery than rubber - Microcore expands gradually and instantly, increasing its surface area on the shoulder and giving the shotgun secure and precise support.

YOUR DIGITAL HUNTING DIARY INTUITIVE AND EASY TO USE

5 GUNPOD 2

Stop wondering how many rounds you shot last month or how many miles you walked with your dog. GunPod 2 will hold these statistics for you! The highlights of your hunting sessions, along with photos and videos, finally collected in a handy digital archive. And if you want to share on social networks? With GunPod 2 you can.

100% PROTECTION FROM CORROSION

7 AQUA

In models equipped with AQUA technologies, all the internal parts are protected against rust and corrosion, while bolt, carrier and trigger are antireflective-treated. The barrel is internally chromed and externally coated to offer the best protection even in the worst conditions.

FAST LOCKING

7 B-LOK

B-Lok allows secure and fast forend's cap closing in fractions of a second and with just a 60 degrees rotation. The design of the cap makes the handling easy even with gloves on.

WORLD'S BEST RECOIL ABSORPTION AND MUZZLE RAISE REDUCTION

8 KICK-OFF

Kick-Off is the only recoil reduction system in the world using technologies similar to the automotive ones, to provide up to 70% shock absorption. In its PLUS and MEGA versions, the Kick-Off system provides even more benefits, specifically tailored on the needs particular types of hunting.

686/687 Silver Pigeon

...and lighter models **Ultralight**

The traditional 686/687 and Ultralight represented the Beretta over & under worldwide in the last 3 decades. Strong like only steel can be and available in 4 gauges and in a wide range of barrel lengths and types, these products are still

trusted companions of hunters around the globe. The Mobilchoke barrels are practically eternal, confirming that a Beretta over and under is much more than an extraordinary shotgun: it's something you can pass down through generations.

486 *Parallelo*

Vintage hunting, cool design, modern technology.

Exclusive Triblock technology

The barrels are matched thanks to the new Beretta Triblock system in order to deliver superior aesthetic and elegance which reflect the style of the classic demibloc shotguns. The care taken in producing the tapered external profile of the tubes enhances the instinctive aiming.

Ultra-safe

An exclusive Beretta safety blocks the trigger preventing the accidental discharge when the shotgun is found in an anomalous position (fully upside down or pointed downwards/upwards past 90°), or in case the shotgun falls or is dropped.

Timeless round-body receiver

The receiver design marries the best gunsmithing tradition of the classic round body profile.

Slim forend

The fore-end features a push-button release mechanism located on the fore-end tip. The fore-end iron presents an adjusting device in order to maintain a constant tip fore-end iron fit. The result is an increase functionality and life of the parts.

Unique trigger mechanism

The trigger mechanism is extremely reliable thanks to the "V" shaped hammer springs and to the rebounding hammers which guarantee crisp and fast trigger pulls. The trigger plate contains all the parts of the firing mechanism, assuring faster and easier disassembly for cleaning and inspection.

Environmentally friendly ejection / extraction selector

The exclusive selector switch, located on the fore-end iron, provides for automatic ejection or manual extraction, which is an environmentally friendly way of keeping spent shells from littering fields.

Optimachoke HP choke tubes

For the barrels provided with interchangeable chokes, the exclusive Beretta Optimachoke® HP (High Performance) choke tubes, with lengthened taper, feature an internal profile to reduce friction and improve the density and distribution of the pattern. The Beretta Optimachoke® HP chokes guarantee significant corrosion resistance and the ability to withstand the rigors of steel shot.

486 Parallelo. Surprisingly light and easy-handling, the new 486 Parallelo Beretta unites the charm of the best gunsmithing tradition with the round body receiver design and with the modern and innovative technology. The result is a classic and elegant look that will never be out of date. A shotgun which is, on the same time, a reliable, safe and accurate firearm.
